SFF Committee

SFF-8601

Specification for

Protocol Negotiation for Ethernet Drives

Rev 0.0 May 22, 2015

Secretariat: SFF Committee

Abstract: This specification defines the protocol to negotiate the speed of single-lane SGMII (Serial Gigabit Media Independent Interface) drives.

This specification provides a common reference for systems manufacturers, system integrators, and suppliers. This is an internal working specification of the SFF Committee, an industry ad hoc group.

This specification is made available for public review, and written comments are solicited from readers. Comments received by the members will be considered for inclusion in future revisions of this specification.

Support: This specification is supported by the identified member companies of the SFF Committee.
