## Safety Summary

The CAUTIONS and WARNINGS which appear on the following pages must be followed to ensure operator safety and to retain the operating condition of the Multimeter.

1. Do not use this product beyond its specifications or for uses not intended for this product as identified by the product functions, ranges, and hazards as indicted below.
2. To minimize possible electric shock hazard condition, connect only two leads at any one time to any of the multimeter terminals.
3. To prevent possible electric shock hazard condition when using the current function, do not leave one probe connected to the circuit under test and the other probe disconnected, exposed, and readily accessible (touchable).

## Safety Symbols

Indicates the operator must refer to an explanation in this manual.

Indicates terminals at which dangerous voltages may exist.

## WARNING

TO AVOID ELECTRICAL SHOCK or damage to the multimeter, do not apply more than $\pm 1000$ Vdc or 1000 Vrms between any terminal and earth ground. Use caution when working with voltages above 60 Vdc or 42 Vpeak. Ensure test leads are in good condition.

## WARNING

POSSIBLE ELECTRICAL SHOCK. Do not make measurements if the case is damaged or the rear cover is removed. Remove all electrical inputs before removing the rear cover.

## WARNING

POSSIBLE ELECTRICAL SHOCK or FIRE HAZARD. Do not expose this multimeter to rain or moisture. Do not operate the multimeter in the presence of flammable gases or fumes.

1-4

## WARNING

POSSIBLE ELECTRICAL SHOCK. Calibration and performance tests are to be performed by qualified personnel only. Do not attempt calibration or test procedures unless qualified to do so.

## CAUTION

To avoid damage to the multimeter for inputs above 250 Vdc or Vac , disconnect the test leads before changing functions. Do not exceed the maximum input limits shown in the following table.

## Maximum Overvoltage Limitations (AC and DC Voltage Functions)

1000V
MAX indicates the maximum voltage between input terminals and earth is $\pm 1000 \mathrm{~V}$ (dc or ac rms).

Do not use the multimeter on any ACV circuit where the maximum impulse overvoltage may be more than 4000 Vpk or any DCV circuit where the maximum impulse overvoltage may be more than 2500 V pk between the COM and VOLT terminals. Excessive impulse overvoltage can damage the multimeter voltage functions. Do not measure branch circuits (CAT II) over 600 V to earth nor service panel circuits (CAT III) over 300 V to earth.

| Function | Maximum Operating Input |
| :---: | :---: |
| $\overline{=-10 \mathrm{~A}}$ | $\pm 10 \mathrm{~A}(\mathrm{dc}$ or ac rms)/600 V |
| $\overline{=--} \sim \mathrm{mA}$ or $\mu \mathrm{A}$ | $\pm 500 \mathrm{~mA}$ (dc or ac rms) / 250 V |
| Capacitance, Diode Test, Resistance, Continuity, Temperature | 660 Vrms (sinewave) |
| Frequency | 660 V rms 2 Hz to 10 kHz <br> 100 V rms 10 kHz to 200 kHz |
| $\overline{--} \sim \mathrm{V}$ | $\pm 1000$ Vdc or Vrms (sinewave) |

## Probes and Test Leads

1. Always inspect probes before use. Do not use test leads whose insulation has cuts, cracks, or other damage that may result in reduced electric shock protection.
2. Keep insulation surface clean between the probe tip connector and the finger guards.
3. If probes other than the ones specified are to be used with the multimeter, be sure the probes and their leads are rated for the voltage and current to which they will be subjected. Do not exceed the voltage ratings for the multimeter.
4. Probes supplied with this multimeter are rated for use up to 1000 Vrms or Vdc.

## Operation

## Terminals, Shutter, \& Test Leads

| $2$ | Function Switch |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |

[^0]
## Function Keys

## Power

Automatic power off after 30 minutes. Alarm sounds 30 seconds before power off.
Power off if input $<80 \mathrm{~V}$ or $<400 \mathrm{~mA}$. Power save if input $>80 \mathrm{~V}$ or $>400 \mathrm{~mA}$, last measurement displayed, power consumption is reduced. Press any key or change any function to cancel. Defeat by holding the $H$ /Autol key for 2 seconds while applying power.

## Relative/Percent

| Press | Action | Main Display | Secondary Display |
| :---: | :---: | :---: | :---: |
| $R e / / \%$ | Makes the last displayed <br> measurement the reference | Each measured value relative to <br> the reference value (difference) | Reference value |
| $R e / \%$ | Calculates the percentage change <br> from the reference | Each measured value as a percent <br> change of the reference value | Reference value |
| $R e / \%$ | Cancels the Relative/\% function | Measured Value | Range |

Perform a zero adjust when using the $400 \Omega$ range or 40 mV range and displayed value is less than 99 by shorting the test leads and pressing this key. Perform a zero adjust on the 10 nF Capacitance range with the leads open. Cycle power to erase the stored zero adjustment.

Minimum/Maximum ${ }^{1}$

| Press | Action | Main Display | Secondary Display ${ }^{2}$ |
| :---: | :---: | :---: | :---: |
| (MIN/MAX) | Begin recording of minimum and maximum values | Each measured value | Elapsed time |
| (MIN/MAX) | Display recorded maximum | Maximum measurement | Time of Maximum |
| (MIN/MAX) | Display recorded minimum | Minimum measurement | Time of Minimum |
| (MIN/MAX) | Display last recorded measurement | Latest measurement | Elapsed time |
| (H/Aut-(1) | Pause recording of minimum and maximum values ${ }^{3}$ | Holds display | Total elapsed time |
| (H/Aut/[II) | Resume recording of minimum and maximum values | Each measured value | Elapsed time |
| (MIN/MAX) $]$ | Press and hold 1 second to cancel | - | - |

Automatic power off and auto ranging are disabled when Min/Max is selected. Bargraph will indicate and hold the maximum values of the bargraph.
${ }^{2}$ Time is recorded and displayed in minutes up to the maximum recording time of 1999 minutes. Recording will stop at the maximum time.
${ }^{3} \mathrm{H}$ annunciator is displayed when $\mathrm{Min} / \mathrm{Max}$ recording
Average

| Press | Action | Main Display | Secondary Display |
| :---: | :---: | :---: | :---: |
| Average | Makes the displayed measurement the <br> average of the last eight measurements | Average value of last eight <br> measurements | Range |
| Averoge | Disables the averaging of measurements | Each measurement | Range |

## Hold/Auto-Hold

| Press | Action | Main Display | Secondary Display |
| :---: | :---: | :---: | :---: |
| (1H/Autolla) | Holds the measurement value in the display | Measurement value when hold pressed | Input value |
| (H/Autoll) | Enters Auto-Hold function ${ }^{1}$ | Measurement value when multimeter beeps | Range |
| (H/Autola) | Cancels Hold function | Measurement value | Range |

1 Auto-Hold Operation. When measurement becomes stable, multimeter will beep and save the stable reading. Removing probe from measuring circuit will display and hold the last stable reading.

## Range

| Press | Action | Main Display | Secondary Display |
| :--- | :---: | :---: | :---: |
| Range | Changes from auto-ranging to manual |  |  |
| ranging |  |  |  |$\quad$ Measurement value $\quad$ Range

1 When upper range is reached, the sequence begins again at the lowest range.

## Select

Press this key to use the functions indicated in yellow on the multimeter. See table on page 1-8.
To test display, hold this key when turning meter on.
HP 973A: Not all annunciators turned on during the display test.

Operation

1-12

## Display

## Low Battery indicator

 Replace batteries when on.
## Main Display

(Annunciators shown inside front cover) Number of digits is set by range and function Displays O.L to indicate an overload condition Entire display flashes if: Input overvoltage or During Amps fuse check

## Secondary Display

Range (most functions)
AC input value (Frequency) Reference value (Relative/\%) Elapsed time (Min/Max)

Bargraph
Active for all functions except:
Capacitance, Temperature, $A C+D C, d B m$

## Audio

| $\mathrm{y}_{\text {BEEP }}=\rightarrow \mathrm{O}_{\text {BEEP }}=$ | Power on <br> First beep at power on. <br> Second beep when beginning to make measurements. |
| :---: | :---: |
| $\bar{y}_{B E E P}=$ | Single beep Indicates any valid function key press. Indicates a new High or Low value recorded when in Min/Max function. |
| $\longrightarrow$ ̇ $_{\text {BEEP }}=\rightarrow$ P | Steady repeating beep Indicates when measurement is steady when using Auto-Hold function. |
|  | Rapid repeating beeps <br> Indicates wrong input terminals used for function selected. <br> Indicates an overload condition at the measurement terminals. |
| $(O)) \\|) \\|_{i}$ | Continuous tone Indicates a resistance of $<20 \Omega$ when using the Continuity function. |
|  | Auto Power Off/Auto Power Save <br> Pairs of beeps for 30 seconds. <br> Long beep just before power off. <br> Cancel by changing function switch position or pressing any key. |

## Calibration and Adjustment

## Required Test Equipment

The source used for the calibration should have an output accuracy as good or better than that listed in the specifications.

## Calibration Procedure

Environmental range for calibration: $23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C},<80 \% \mathrm{RH}$ Calibration interval: 1 Year

1 Disconnect all inputs from the multimeter and open the case as described on page 6-5.
2 Install new batteries (described below) and close the cover. Turn the multimeter on and allow a 30 minute warm-up. Open the case.

3 Set the multimeter function and range and the source output to the values specified at each step in the table on page 6-1.

4 When appropriate, make the adjustments indicated in the table to bring the multimeter display within the limits.

## CAUTION

Dangerous voltages are present during the calibration procedure. Calibration should only be performed by qualified service technicians. Use a non-conductive adjustment tool.

## Maintenance

Operator protection from electic shock hazard is provided by a double insulated enclosure. Refer to pages 1-4 and 1-5 for maximum voltage specifications. When servicing, use only specified replacement parts.

## Battery Replacement

Replace the battery when the symbol appears in the display or before calibration. Replace both batteries at the same time. Use high-quality type AA alkaline (IEC LR6) batteries. Remove the batteries if the multimeter is to be stored for extended periods of time. Refer to the disassembly drawing on page 6-5.

## Fuse Replacement

Fuse locations are shown in the diagram on page 6-5. Fuses are listed in the replaceable part list on page 6-4. See fuse check procedure in the Troubleshooting table below.

CAUTION
For continued protection use only the specified manufacturer part number or HP part number fuse for replacement purposes.

Maintenance

## Troubleshooting

| Problem | Possible Cause | Suggested Action |
| :---: | :---: | :--- |
| Unit won't turn on | Dead Batteries | Replace batteries |
| Unit won't turn off | Input limit exceeded | Remove test leads and press any key to reset |
| Display flashes <br> and <br> Rapid beeps | Input limit exceeded | Remove test leads and press any key to reset |
|  | Test leads in wrong <br> terminal for measurement <br> function | Change test leads or function switch position |
| Battery Annunciator on | Low battery voltage | Replace batteries |
| Unable to measure <br> current <br> 10 A or $m A-\mu A$ | Open input protection fuse | Check fuse. Connect test lead between V input <br> terminal and 10A or mA $\mu A$ terminal. Unit will <br> rapidly beep if fuse is OK. Replace fuse if no <br> beep. |

## Cleaning

Wipe instrument with a soft rag dampened with soap and water. Do not immerse in water.
Do not use chemical cleanser or solvents.

## Replaceable Parts/Accessories

Refer to the disassembly diagram on page 6-5.

## Specifications

Calibration period: one year minimum. Specifications apply at $23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C},<80 \% \mathrm{RH}$
Accuracy $= \pm(\%$ of reading + number of digits)
Temperature Coefficient $=$ Accuracy $\mathrm{X} 0.1{ }^{\circ} \mathrm{C}\left(-10^{\circ} \mathrm{C}\right.$ to $18^{\circ} \mathrm{C} ; 28^{\circ} \mathrm{C}$ to $\left.55^{\circ} \mathrm{C}\right)$

## General

Do not expose product to moisture or rain. Do not use product in flammable atmosphere.
Operating Temperature: $-10^{\circ}$ to $50^{\circ} \mathrm{C}$.
Humidity: $0^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C} / 80 \% \mathrm{RH} \max , 40^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C} / 70 \% \mathrm{RH} \max$ (no condensation). Storage Temperature: $-25^{\circ}$ to $60^{\circ} \mathrm{C} / 70 \% \mathrm{RH} \max$ (no condensation).

Display reading rate:

ACV, DCV, Diode, Continuity:
Frequency
Capacitance
AC + DC
Bargraph reading rate:
Battery life: Approximately 600 hours

Approximately $2.3 /$ second
Approximately $1 /$ second Approximately 0.03 to $2 /$ second
Approximately 0.5 to $1 /$ second
Approximately 23/second

## DC Voltage

| Range | Resolution | 972A | 973A | Input Resistance |

## Adjustments

## Calibration Table

CAUTION
Dangerous voltages are present during the calibration procedure. Calibration should only be performed by qualified service technicians. Use a non-conductive tool.

| Step | Function | Range | Input Signal | Adjustment (limits) | Tolerance (counts) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | 972A | 973A |
| 1 | --- mV | 400 mV | Short | - | $\pm 1$ | $\pm 1$ |
| 2 |  |  | 380.0 mV | $1( \pm 1)$ | $\pm 8$ | $\pm 4$ |
| 3 |  | 40 mV | 38.00 mV | $2( \pm 1)$ | $\pm 18$ | $\pm 16$ |
| 4 | $=-\mathrm{V}$ | 400 V | 380.0 V | $3( \pm 1)$ | $\pm 8$ | $\pm 4$ |
| 5 |  | 4 V | 3.800 V | $4( \pm 1)$ | $\pm 8$ | $\pm 4$ |
| 6 |  | 40 V | 38.00 V | $5( \pm 1)$ | $\pm 8$ | $\pm 4$ |

Calibration Table

| Step | Function | Range | Input Signal | Adjustment (limits) | Tolerance (counts) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | 972A | 973A |

${ }^{1}$ Perform zero adjustment using Rel/z) key.

## Replaceable Parts/Accessories

Refer to the disassembly diagram on page 6-5.

| Call out | Description | HP Part Number |  |
| :---: | :---: | :---: | :---: |
| F1 | Fuse, $500 \mathrm{~mA}, 250 \mathrm{~V}$ fast blow Littlefuse 216-500 DO NOT SUBSTITUTE | 2110-0940 |  |
| F2 | Fuse, 15 A, 600 V fast blow Littlefuse KLK15 DO NOT SUBSTITUTE | 2110-0941 |  |
| MP1 | Top case assembly | 00972-64401 | 00973-64401 |
| MP2 | Dust/moisture seal | 00971-64403 |  |
| MP3 | Bottom case assembly (includes stand) | 00972-64402 |  |
|  | Replacement Test Leads, 2 pair | E2305A |  |
|  | Temperature probe, $5 \mathrm{~K} \Omega$ Thermistor | E2308A |  |
|  | Surface temperature sensor, Thermistor $\pm 0.1^{\circ} \mathrm{C}$ 12" lead, requires dual banana plug | 40653B |  |
|  | Temperature probe, $K$ type thermocouple for 973A only | E2307A |  |
|  | Rubber Boot | 00971-86001 |  |
|  | Soft Case (fits meter with rubber boot) | E2304A |  |

Operator protection from electric shock hazard is provided by a double insulated enclosure. Refer to the Safety Summary for maximum voltage specifications. When servicing, use only specified replacement parts.

Disassembly
WARNING
Always disconnect the test leads before opening the case.

## Warranty/Service

## Limited 3 Year Warranty

## What is Covered

The HP 972A or HP 973A Multimeter is warranted by Hewlett-Packard against defects in materials and workmanship for three years from the date of original purchase. If you sell your unit or give it as a gift, the warranty is automatically transferred to the new owner and remains in effect for the original three year period. During the warranty period, we will repair, or at our option, replace at no charge, a product that proves to be defective, provided you return the product, shipping prepaid, to a Hewlett-Packard service center.

## What is Not Covered

This warranty does not apply if the product has been damaged by accident of misuse or as the result of service or modification by other than an authorized Hewlett-Packard service center.

No other express warranty is given. The repair or replacement of a product is your exclusive remedy. ANY OTHER IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS IS LIMITED TO THE THREE YEAR DURATION OF THIS WRITTEN WARRANTY. Some states, provinces, or countries do not allow the exclusion or limitation or incidental or consequential damages, so the above limitation or exclusion may not apply to you.

The warranty gives you specific legal rights, and you may also have other rights which vary from state to state, province to province, or country to country.

## Service

Hewlett-Packard maintains service centers in many countries throughout the world. You may have your unit repaired at a Hewlett-Packard service center any time it needs service, whether the unit is under warranty or not. There is a charge for repairs after the warranty period. Repair or replacement during the first 30 days after purchase will be provided by the sales channel. After 30 days, contact the nearest service office.

Hewlett-Packard products normally are repaired and reshipped within five (5) working days of receipt at any service center. This is an average time and could possibly vary depending upon the time of year and work load at the service center. The total time you are without your unit will depend largely on the shipping time.
